

Prior Learning Credit in Lieu of Internship Completion

You have requested Prior Learning Credit for SCS470 (Internship) based on your professional workplace experience. Please reflect on your previous work experiences, volunteer activities, or significant projects that you have undertaken *as they relate to your chosen Tiffin University program of study*. Describe in detail how these experiences have equipped you with the skills, knowledge, and competencies that are comparable to what would be gained through a traditional internship in your field of study. Before composing your essay, you may wish to review the [Learning Outcomes](#) for your program of study.

Your essay should address the following points:

Detailed Description of Experience:

Provide a comprehensive overview of your work, volunteer, or project experiences. Highlight specific roles, responsibilities, and the duration of each experience.

Skill Development:

Identify and discuss specific skills and competencies you developed through these experiences. Relate these skills to those typically acquired in an internship in your field.

Professional Growth:

Reflect on how these experiences contributed to your professional growth and preparedness for your career. Include examples of challenges faced, how you addressed them, and the skills knowledge you gained.

Your essay should be:

- Well-organized, clearly written, and provide concrete examples. You may use the above three points as an outline for your essay.
- Approximately 200-300 words in length.

The assessment of your essay will focus on the depth of reflection, the relevance of your experiences to the internship objectives, and the clarity with which you articulate your learning and professional development.
